

Confidential Factoring

You want a flexible supply of working capital and the time to realise your business plans.

The Solution.

A Confidential Factoring facility provides the working capital you need to grow your business.

What does it mean for your business?

An immediate injection of cash into the business and an ongoing supply of working capital.

A source of funding, which grows in line with your sales.

We can save you valuable management time by chasing and collecting outstanding invoice payment on your behalf.

This service is carried out confidentially, which means your customers do not need to know of our involvement.

How does it work?

An initial injection of cash into your business of up to 85% of your outstanding invoices.

A copy of all sales invoices and credit notes are submitted to the financier as they are raised.

The financier will then convert up to 85% of unpaid invoices into cash within 24 hours, less a small service fee.

The remaining 15% will be paid to you once payment is received from your customer.

We will prepare and send out letters and statements, telephone your customers, collect payments for you and maintain professional and detailed accounts of your transactions.

All correspondence, verbal and written with your customers, will be handled by a dedicated team using your company name, ensuring that the facility is kept confidential at all times.

You are also given 24-hour Internet access to your customers' accounts, to ensure you are always informed of the latest position.

What does it cost?

Services are tailored to your business so the fees will depend upon your specific needs.

There are two types of fee. The first is the cost of money you use, which is extremely competitive when compared with other forms of finance. The second is a service fee.

What to do next.

If you would like to find out more about our confidential factoring facility, then call us today on [01246 241002](tel:01246241002).

You'll be able to talk to an experienced member of our team who will answer your questions and explain in more detail how we can provide a flexible solution for your business.
